CONSTRUCTION EQUIPMENT

Goscor Power Products offers Construction Equipment (Petrol & Diesel Engine Options Available):

- Rollers
- Rammers
- Power Trowels
- Plate Compactors
- Concrete Cutters
- Drive Units, Pokers & Submersible Pumps
- Concrete Mixers
- Pipeline Testers

Available from Dealers Nationwide in South Africa and in SADC Countries.

1.1 ROLLERS

Working in the harsh African construction business is tough and requires construction equipment and power products that are built even tougher. At Goscor Power Products we understand what is required in the industry and offer reliable and strong products that get the job done well the first time.

At Goscor Power Products we offer a range of roller compactors for the construction, building, landscaping and hiring industries that are affordable. If you're looking for rollers for the construction, landscaping or hire business, look no further than Goscor Power Products today.

Our range of vibratory rollers are diesel powered and either air or water cooled. They range in weight from 700kg with a drum size of 680mm. Goscor Power Products' road rollers have a compaction of 17kN and are specifically designed with double-drum, hydrostatic driven roller technology for safe, easy operator use.

Goscor Power Products' vibratory rollers are excellent for any large soil compaction job needed for the construction industry which includes asphalt compaction. Our rollers have also been used to even and roll cricket pitches too.

For more on our range of roller machines for construction, call Goscor Power Products today on 087 542 0256 / 087 806 6872 or request a roller quote now.

Construction Equipment

CHOOSE FROM OUR WIDE RANGE OF ROLLERS

When it comes to road rollers, the Goscor Power Products' range of soil compactor rollers offer a multitude of features that are a must for any construction site.

Features of the Roadway rollers include:

- **Roadway hydraulic-drive system for variable working speed for travel and vibration; eliminating regular maintenance and adjustments that chain driven rollers require.**
- **Deadman control lever offers reversing protection.**
- **Anti-vibration controls ensure non-fatiguing and low vibration for operator.**
- **Drive system with variable pump, fixed displacement hydraulic motor, stepless speed, easy to change direction.**
- **Corrosion-free, rear-mounted water tank reduces sound and keeps dust to a minimum.**
- **Hand-controlled vibration and speed controls for ease of use.**
- **Two scraper bars on each drum for clean working when on asphalt.**
- **Fully hydrostatic**
- **Air-cooled or water-cooled roller options**

1.1 ROLLERS

GOSCOR POWER PRODUCTS, THE LEADERS IN ROLLER COMPACTORS

Goscor Construction Equipment, part of the Goscor Group of Companies, with 30 years of experience in the power product industry, is a leading Southern African distributor of a quality range of generators, engines, pumps and light compact construction equipment. Products are tested to meet the stringent demands of Africa's harsh dry and dusty conditions to ensure optimum reliability for maximised uptime and low total cost of ownership.

Choose Goscor Power Products today for vibrating roller compactors. Choose the leaders in construction equipment, a company you can trust.

For more information on our roller compactor range or to request a roller quote, contact us now

1.2 RAMMERS

For construction equipment that can withstand the toughest construction site and job, choose from Goscor Power Products' range of affordable and reliable construction equipment today.

When it comes to rammers, Goscor Power Products offers rammers suitable for most construction companies, bakkie builders and hire companies. Our range of rammer compactors are specifically designed for easy, smooth operation. The simplified design of our vibratory rammer range requires little maintenance offering higher productivity and increased output.

Thanks to our 30 years of experience in the power product industry, we are able to proudly offer rammers with a range of features and outputs. Our range includes petrol powered rammer compactors ranging from 75-76kg with an output of 13-14kN, suitable for most compacting applications on any construction site such as back filling of trenches, pot hole repairs and compacting of light sand to gravel applications such fibre optic trenches.

For more on our range of tampering rammers contact Goscor Power Products today on 087 542 0256 / 087 806 6872 or request a rammer quote now.

Construction Equipment

WIDE RANGE OF USES AND FEATURES ON OUR RAMMER COMPACTORS

Our range of tampering rammers all offer low centres of gravity for stability and ease of operation. Goscor Power Products' tampering rammers can be used for:

- **Compaction of most types of soil (including cohesive clay types) in medium and deep layers, trenches, foundations and backfills.**
- **Compaction work in confined areas and where high compaction density is required.**

Our range of rammers include features necessary for any construction environment, including:

- **Custom-designed, 4-stroke petrol engines for easy starting, low-noise operation, low maintenance and reduced fuel consumption.**
- **Innovative throttle lever which guarantees longer life and smooth operation.**
- **Heavy shock mount system to reduce hand and arm vibration and improve operator comfort.**
- **Durable plastic fuel tank offers longer life and is rust-free.**
- **Protective side frame cover protects the engine.**
- **Rammer foot with steel plate and laminated wood insert.**
- **Outstanding body balance maximizes work efficiency and minimizes operator fatigue.**
- **Dual filtration system for the Engine to ensure a long working life.**
- **German Bellow housing.**
- **Japanese bearings inside the rammer.**

Sealed bearing on the clutch housing, no lubrication required.

CHOOSE A NAME YOU CAN TRUST

Goscor Power Products, part of the Goscor Group of Companies, with 30 years of experience in the power product industry, is a leading Southern African distributor of a quality range of generators, engines, pumps and light compact construction equipment. Products are tested to meet the stringent demands of Africa's harsh dry and dusty conditions to ensure optimum reliability for maximised uptime and low total cost of ownership.

Choose Goscor Power Products today for tampering rammers. Choose the leaders in construction equipment, a company you can trust.

For more information on our rammer range or to request a rammer quote, contact us now.

1.3 POWER TROWELS

Whether you need power trowels for the smallest or the largest of building applications, Goscor Power Products will have just the product for you. We offer petrol and diesel power trowels in a variety of sizes that come with a range of excellent features needed for the tough South African construction market.

All our power trowel machines are easy to lift and can manoeuvre in hard to reach places. Our products have been designed to be easy to use, ensuring efficiency with minimal breakdowns. The product range is well priced and affordable to maintain as well thanks to the low application costs. No matter the need or requirement, our power trowel range can do the job.

Thanks to the variety of features available from our range, our power trowels can be used for applications across the construction, mining, agricultural and industrial industries. We're the leaders in the business and we understand what you need.

For more on our range of concrete power trowels, call Goscor Power Products on 087 542 0256 / 087 806 6872 or request a power trowel quote now.

Construction Equipment

POWER TROWELS FOR EVERY APPLICATION

Our affordable and reliable walk behind power trowel range offers features that are much-needed in the construction industry, where time is of the essence and having a power product that can withstand a tough environment is key.

The features of our power trowel range include:

- **Easy to use and manoeuvre**
- **Independent rotating blades allows for operating in tight corners and confined spaces**
- **Optional belly pan for concrete polishing**
- **Screw control ensures precise blade adjustment**
- **Durable blades for affordable longevity**
- **Horse power ranges from 5HP - 9HP**
- **Trowel diameter range from 36inch to 42inch**
- **Speed range from 60-100r/min**
- **Operating weights between 80kgs – 100kgs**
- **Replaceable blades available at low cost**

We proudly stock both RATO and WEIMA power trowels.

Construction Equipment

THE LEADERS IN CONSTRUCTION EQUIPMENT FOR OVER 30 YEARS

From concrete cutters to plate compactors and from rammers to rollers, at Goscor Power Products you'll find the highest quality construction equipment at the most competitive prices, country wide. Thanks to our over 30 years' worth of experience, we've become known by our loyal customers in the agricultural, mining, industrial and construction sectors as the 'go to' company for quality power products.

No matter what your application, need or site terrain, we'll have a piece of construction equipment that's built tough and offers excellent reliability for you. If you're looking for the most competitive power trowel price, give us a call today.

Choose Goscor Power Products today for a product designed for your needs. Choose the leaders in construction equipment, a company you can trust.

For more information on our power trowel range or to request a quote, contact us now.

1.4 PLATE COMPACTORS

Looking for a plate compactor for all your construction needs? Buy a plate compactor from Goscor Power Products today, we guarantee affordability and reliability. We're known by construction companies, bakkie builders and hire companies across South Africa because the plate compactor machines we stock are built tough, and they get the job done well.

Our range of plate compactors come with a variety of features, engine types and sizes. No matter what your building requirements, we have a plate compactor to suit. Whether you need an 85kg asphalt plate compactor or a 135kg hydraulic reversible plate compactor, at Goscor Power Products we'll stock it.

Choose from the leaders in power products for the construction, mining, agricultural or industrial industries, choose Goscor Power Products today.

For more on our range of plate compactors, call Goscor Power Products on 087 542 0256 / 087 806 6872 or request a plate compactor quote now.

Construction Equipment

PLATE COMPACTORS BUILT TOUGH TO DO ANY JOB

All our vibratory plate compactors are easy to use. Wheel kits allow the compactors to be easily manoeuvred and they are designed for a multitude of applications such as foundation compaction, back filling, paving, pothole repairs and asphalt work too.

Whether you choose a petrol or diesel engine compactor, both are designed to work in the dustiest conditions thanks to the superior air filtration systems available, such as either the “snorkel type” or “Cyclone Type” air cleaners.

The features of our plate compactor range include:

- **Foldable handle allows for easy transportation and storage**
- **Centrally-mounted, fully-enclosed exciter for an even spread of force over the whole base plate**
- **Heavy-duty shock mounts reduce vibration to the upper engine and handle**
- **Open design reduces dirt build-up**
- **Horse power ranges from 5HP - 9HP**
- **Weight ranges of between 85kgs - 316kgs**
- **Varying plate sizes for a variety of applications**
- **Centrifugal force range of between 14kN and 38kN**
- **Varying maximum travel speeds between 20m/min and 25m/min**
- **Vibrating frequency range between 4050VPM and 5010VPM**
- **Snorkel or Cyclone air cleaners available for petrol engines**
- **Oil bath air cleaners for diesel engines.**

1.4 PLATE COMPACTORS

We pride ourselves on being known as the leaders in the sale of top-quality construction equipment products. No matter what your construction, mining, agricultural or industrial product need, we are guaranteed to stock it. We've been in the industry for over 30 years and we understand what the South African market wants and needs; top quality products, built strong and reliable enough to get the job done well.

No matter the site, no matter the conditions, our power products are built to last. Choose Goscor Power Products today for a plate compactor for any construction application. For more information on our plate compactor range or to request a quote, contact us now.

1.5 CONCRETE/ASPHALT CUTTERS

In need of a concrete/asphalt cutter that can cut through asphalt like a hot knife through butter. Choose from Goscor Power Products' range of concrete cutters for all your concrete/asphalt cutting construction needs. Our range is built tough to cut through the toughest of surfaces.

Thanks to our over 30 years in the industry, we are able to offer a range of asphalt and concrete cutters that are robust and reasonably priced to the construction, hiring industries. We provide saws that can withstand even the hardest of jobs.

Our concrete asphalt cutters are both petrol and diesel powered, depending on the needs of the job or company. They are built tough enough to take on concrete cutting as well as asphalt cutting applications such as expansion joint cutting or edging of tar roads. Our Cutters can be used in fibre optic applications where the user needs to cut through tar or driveways etc.

For more on our range of concrete/asphalt saw cutting machines, call Goscor Power Products today on 087 542 0256 / 087 806 6872 or request a concrete cutter quote now.

Construction Equipment

CONCRETE/ASPHALT CUTTERS – BUILT TOUGH WITH A RANGE OF FEATURES

Thanks to the strong, simple design of our concrete/asphalt saw cutting equipment range we are able to offer construction equipment that can take on any asphalt or concrete surface cutting work with excellent accuracy and ease of use.

The features of our concrete/asphalt cutting range include:

- **Blade sizes of up to 450mm, operating weight of 116kgs and maximum cutting depth of 14.5cm.**
- **Double water blade cooling system.**
- **Extended frame with a cutting guide for accuracy of work.**
- **Robust, state-of-the-art, professional engine used – 15HP petrol.**
- **Easy cutting depth adjustment control.**
- **Corrosion-free water tank with heat guard.**
- **Easy blade replacement.**
- **Comfortable grip handles.**
- **Hinged front lift for blade guard.**
- **Emergency stop for heightened safety.**
- **Rubber wheels.**
- **Dual Engine filtration system, to work in dusty conditions, we use the a specially designed snorkel air filter.**

If you're asking yourself, "where can I find concrete/asphalt saw cutting near me?". Goscor Power Products is the answer thanks to our hardy range of the best concrete cutters on the market.

1.6 DRIVE UNITS, POKERS AND SUBMERSIBLE PUMPS

- Our Drive Units, Pokers & Submersible Pumps are affordable and reliable for most construction companies, bakkie builders and hire companies.
- We offer Petrol & Diesel. From 5HP - 7HP
- The drive units are available in cradle type frames as well as a sturdy roll over frame.
- Our pokers have double NSK bearings.
- Poker Sizes: 38mm, 45mm & 60mm.
- Cable Size: 8mm to 10mm.
- Application include foundations, concrete floors, concrete slabs and concrete walling.
- Submersible Pumps 80mm.
- Clear Water & Trash Pumps.

Construction Equipment

HOW DIFFERENT TYPES OF CONCRETE VIBRATORS WORK:

Internal vibrators are the most common type of concrete vibrators used. The operator inserts a poker vibrating needle into the wet concrete, then slowly pulls it out.

If you are doing precast work, you may need a formwork vibrator which mounts to the outside of formwork to vibrate and release bubbles.

DRIVE UNITS, POKERS AND SUBMERSIBLE PUMPS

Goscor offers a comprehensive range of Drive Units, Pokers and Submersible Pumps. Our high-quality equipment is affordable, making it the perfect choice for construction companies, bakkie builders and hire companies. We've been providing reliable equipment to the building trade for over 30 years, and we're known for our quality equipment from world-leading brands.

Contact us for a quote today.

1.6 DRIVE UNITS, POKERS AND SUBMERSIBLE PUMPS

Concrete Vibratory Drive Unit

Our Concrete Vibratory Drive Units are connected and Vibratory Pokers release air bubbles in the concrete. The drive units are available in cradle type frames as well as a sturdy roll over frame. We offer both petrol and diesel units from 5HP - 7HP.

Rato Ecoline Drive Unit in Roll-Over Frame

Diesel Drive Unit in Roll-Over Frame

Range			
Model	DUVR/R210LS_RF	DUVR/R210RF	DUVR/WM173F/RF
Engine	Rato R210LS (Ecoline)	Rato R210	Weima WM173F
HP	7HP	7HP	5HP
Fuel	Petrol	Petrol	Diesel

Length of flexible pipe	6m	6m	6m

1.6 DRIVE UNITS, POKERS AND SUBMERSIBLE PUMPS

Submersible Pumps

Goscor also supplies a range of submersible pumps. Our pumps are suitable for both clear water and trash applications. You'll find our pumps are perfect for sewage pumping, industrial pumping and slurry pumping. We also offer a 80mm submersible pump powered by petrol and a diesel drive units with a 6m drive hose.

FEATURES:

- Fitted with 2 x NSK Bearings rated at 250 hours
- 10mm Drive Cable
- Made of aluminium casting and can be used with ease even in areas without access to power supply
- The high performance pump is designed to prevent large objects from entering into the pump.
- The pump can be driven by the engines through flexible shaft inserted in the hose
- Drive unit required to run the submersible pump!

1.7 CONCRETE MIXERS

Our Concrete Mixers are affordable and reliable for most construction companies, bakkie builders and hire companies.

We offer concrete mixers for sale including petrol & diesel options, with 400l capacity. Our mixers are 2 wheel driven with draw bar for easy manoeuvrability on site. Protection over the ring gear, sealed drum bearing, easy tilt mechanism and internal gear box for smooth operation.

Application: Concrete mixing for DIY as well as the construction site mixing.

Features:

- **Special casting of steel gear ring made in one piece**
- **Solid frame for high stability**
- **Large 240mm diameter wheels for stability and manoeuvrability**
- **Large drum diameter for excellent mixing results**
- **Swivel and tilts 180°C for easy and complete discharge**
- **Driving shaft mounted on sealed ball bearing**
- **Low rotation speed is obtained by a 2:1 reduction gearbox in the Concrete Mixer**
- **2 Rubber wheels and draw bar with loop hitch provided on our 400l mixers for easy transportation**
- **Large engine cage**
- **Professional series engines used**
- **Oil Bath Filters**

Applications:

Construction Site | Home Use | Farm Use | Mining

Construction Equipment

CONCRETE MIXERS

Goscor Power Products provides a range of high-quality concrete mixers, which are not only affordable but also a reliable solution for construction and hire companies. Our concrete mixers are ideal for construction site mixing as well as DIY applications.

Our range of concrete mixers are available in diesel or petrol. They are two-wheel driven for ease of use, with a drawbar as well. They also feature an easy tilt mechanism, sealed drum bearing and internal gearbox for a very smooth and comfortable operation.

1.8 PIPELINE TESTERS

For pressure testing equipment that is robust, tough and can work onsite without the use of electricity, contact Goscor Power Products today. We specialise in supplying power units like pipe testing equipment to the construction, mining, agricultural and industrial sectors across South Africa.

Our pipeline testers are built tough and we guarantee to offer you options that are manufactured to the highest standard. We also strive to offer the most affordable prices on all our options too. If you are needing reliable, affordable equipment for your site, call the best in the business today.

For more on the pipe pressure testing equipment we have available to buy call Goscor Power Products on 087 542 0256 / 087 806 6872 or request a quote now.

HYDRO TESTING EQUIPMENT WITH A RANGE OF PROPERTIES AND BENEFITS

At Goscor Power Products, we only stock power gear that can withstand the toughest jobs in some of the most demanding industries in South Africa. Our pipeline testers are excellent for a multitude of applications and offer the following benefits:

- **Petrol- or diesel-powered options available**
- **Ideal for testing pipelines on site where no electricity is available**
- **Completely portable**
- **7HP unit available with Max RPM of 3600RPM**
- **40BAR pressure capability**
- **60l/min capability**

Our unit comes with certified gauges as well as other accessories like rubber delivery hoses, suction hose and suction strainers.

Construction Equipment

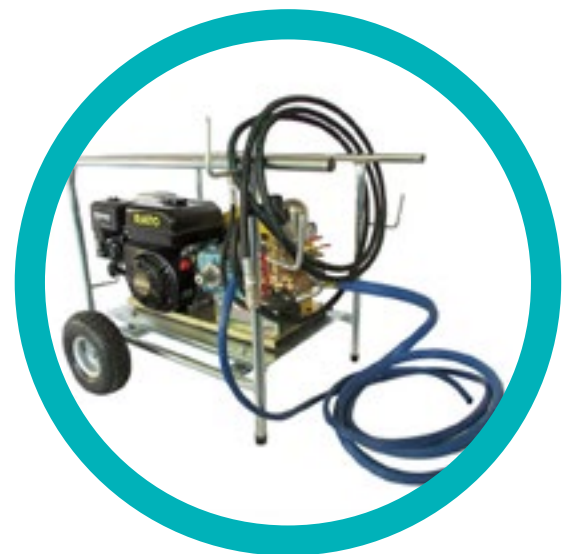

THE SOUTH AFRICAN LEADERS IN CONSTRUCTION EQUIPMENT

Our name is synonymous with quality as we specialise in reliable products built to do the job well the first time – at the most competitive prices too. For over 30 years we’ve learnt and understood what the unique South African industrial, mining, construction and agricultural markets want from products like pipeline testers and we aim to deliver.

When it comes to pressure testing equipment call us today to discuss your needs in detail. Choose a company that understands your needs and has the range to prove it. Choose the leaders in construction units, a company you can trust.

For more information on our pipeline hydrotest range or to request a quote, contact us now.

HIGH PRESSURE WASHERS

High pressure washers are the perfect tool for a range of cleaning jobs on construction sites. And every construction job needs some sort of a clean-up – whether its stripping concrete forms, cleaning tools and equipment, power washing vehicles and heavy earth moving machinery or sanitizing your home, barn or workshop / patio, pressure washers are a vital tool.

Home owners and small business owners can also benefit from the purchase of high pressure washers which can be used for general home clean-ups (sanitizing of homes, braai areas, garage or pool decks) and car washes. Goscor Power Products offers a range of Industrial High Pressure Washers that are affordable and reliable. An Industrial high pressure washer price is still affordable compared to market prices, and generally it's an expense that any construction company, bakkie builder, hire company or small business owner can afford.

3. HIGH PRESSURE WASHERS

Which High Pressure Washers to buy?

If you're wondering which high pressure washer to buy, consider Goscor's range of high pressure washers. We offer petrol, diesel and electric (220V & 380V) high pressure washers. Our machines range from 120BAR up to 248BAR. Flow rates range from 6.5 litres per minute to 25.9 litres per minute

All units are mounted on mobile trollies on either rubber/ hardened wheels plastic wheels. Standard equipment includes: a spray gun, multi-nozzles, a 10m hose and suction hose with a strainer. Additional accessories can be purchased for the high pressure washers including thermal valves, a turbo nozzle, a pressure gauge and an adjustable nozzle. Our pressure washers have built in detergent nozzels with detergent feeders.

If you're wondering where to buy a high pressure washer, look no further. Goscor's range of high pressure washers are perfect for just about any application from DIY home owner to heavy duty construction site.

INDUSTRIAL HIGH PRESSURE WASHERS ON CONSTRUCTION SITES

Many contractors use a high pressure washer for removing dust from walls before painting and for general clean up after a job is finished, our pressure washers can also be used to sanitising purposes, using detergent feeders with a mixture of bleach and water very effectively. A heavy duty high pressure washer can be used in a wide range of applications during the construction process.

You can use a pressure washer to clean grease and grime off construction vehicles. You can also use them to remove sand and mud from earth moving equipment. By keeping your vehicles clean you can extend their life and lessen the need for repairs.

Floors, tiles, roads and paving all get very dirty during the construction process. A heavy duty high pressure washer can help you get rid of paint spots, oil stains, dust, grease and grime. Pressure washing your site regularly can help your operation look clean and professional at all times. Our High pressure cleaners can also be used to clean roofs at Coastal areas, longer delivery hoses can also be supplied for this application.

A Portable high pressure washer can be moved quickly and easily to the right location so you can clean any area of your site. When buying a pressure washer, look out for mobile units fitted with pneumatic wheels for easy maneuverability.

GENERATORS

Our Generators are affordable and reliable for most construction companies, bakkie builders and hire companies.

Goscor Power Products offers a locally assembled range of petrol and diesel generators and welder generators. Ranging from 2.5KVA up to 10KVA available in 220v and 380v with options of AVR (Automatic Voltage Regulation). We also offer an imported range from Lutian Power Products available in petrol or diesel, super silent and silent, covering a range of 2.5KVA up to 110KVA. Larger units are available.

AVR (Automatic Voltage Regulation) on all imported units. These generators are ideal for construction use, mines, industrial, agricultural and home use as well as mobile clinics / hospitals or COVID-19 test facilities, police road blocks.

Goscor Power Products also offers a range of inverter generators from Rato, which covers a range of 1.6KVA to 7.8KVA. This range offers the purest standby power from a generator.

This is suitable for applications where sensitive electronic equipment is used or where noise levels need to be as low as possible- making it ideal for the film industry.

4.1 PETROL GENERATORS

RATO

Goscor Power Products specialises in a range of petrol generators. We carry major brand names such as Rato and Lutian, ensuring durable and cost-effective generator solutions. Our petrol generators range from 1KVA up to 10KVA and are available in 220v and 380v, with optional AVR (Automatic Voltage Regulation). AVR is available on all imported units and they are ideal for construction use, mines, industrial, agricultural and home use. 4.3 MEDIUM SIZE DIESEL GENERATORS

Goscor Power Products specialises in a range of diesel generators. With various well-known brands such as Weima and Lutian, we offer high-quality, durable generator solutions. Our diesel generators range from 4.2KVA up to 110KVA, all have AVR (Automatic Voltage Regulation). AVR is available on all imported units and they are ideal for construction use, mines, industrial, agricultural and home use.

Generators

FOR A VARIETY OF GENERATORS, CALL GOSCOR TODAY.

We also supply a range of reliable inverter generators, which offers a pure standby power source and offers a power output that ranges between 1.6KVA to 7.8KVA. These petrol generators are ideal for applications where sensitive electronic equipment is used, or where low noise levels are required, making them ideal for the film industry. We also offer an imported range of diesel generators from Lutian Power Products, available in super silent and silent, covering a range of 4.2KVA up to 200KVA. Larger generator units are also available on request.

4.3 DIESEL GENERATORS

Goscor Power Products specialises in a range of diesel generators. With various well-known brands such as Weima and Lutian, we offer high-quality, durable generator solutions. Our diesel generators range from 4.2KVA up to 110KVA, with optional AVR (Automatic Voltage Regulation). AVR is available on all imported units and they are ideal for construction use, mines, industrial, agricultural and home use.

Weima GPP7000DW_TR

Generators

FOR A VARIETY OF GENERATORS, CALL GOSCOR TODAY.

Part of our diesel generator range is the powerful HXC-55S-3, which provides an output of 55kVA and an electric starting system. It has a silent operation and offers three-phase power. The HXC-28SS-3 offers a 28kVA output and an Automatic Transfer Switch (ATS).

In the Weima range, we have the WM5000CL and WM7000CLE, which offers a 5Kva and 6.5 KVA output and an open frame design, as well as the GPP7000DW_TR which offers an output of 7kVA and a recoil starting system. These generators have a solid build and are reliable, cost-effective and powerful.

4.5 INVERTER GENERATORS RATO

At Goscor Power Products we provide a range of reliable and affordable inverter generators from Rato. These generators are durable and packed with features. They are ideal for a variety of applications, especially in environments where you need a constant current flow. Our inverter generators range from 1.6KVA up to 7.8KVA, with recoil starting systems. They have a noise operation of between 68dB and 84dB with some of them offering an open frame design.

4.6 WELDER GENERATORS

At Goscor Power Products we provide a range of affordable and powerful welder generators from popular brands such as Weima and Rato. Our welder generators offer an output of 7kVA and are available in both petrol and diesel options. Welder generators are specifically manufactured to provide reliable power without the need to rely on mains electricity. A welder generator provides you with adequate power for your welding equipment whenever you need it. A portable welder generator is ideal for farms, construction sites, repairs and maintenance.

WATER PUMPS

We offer a wide range of water pumps, ranging from 50mm up to 100mm (2" to 6") port size.

Our water pumps are available in both petrol and diesel and the range covers clear water, trash, chemical pumping (such as fertilizers and salt water pumping) and slurry pumping.

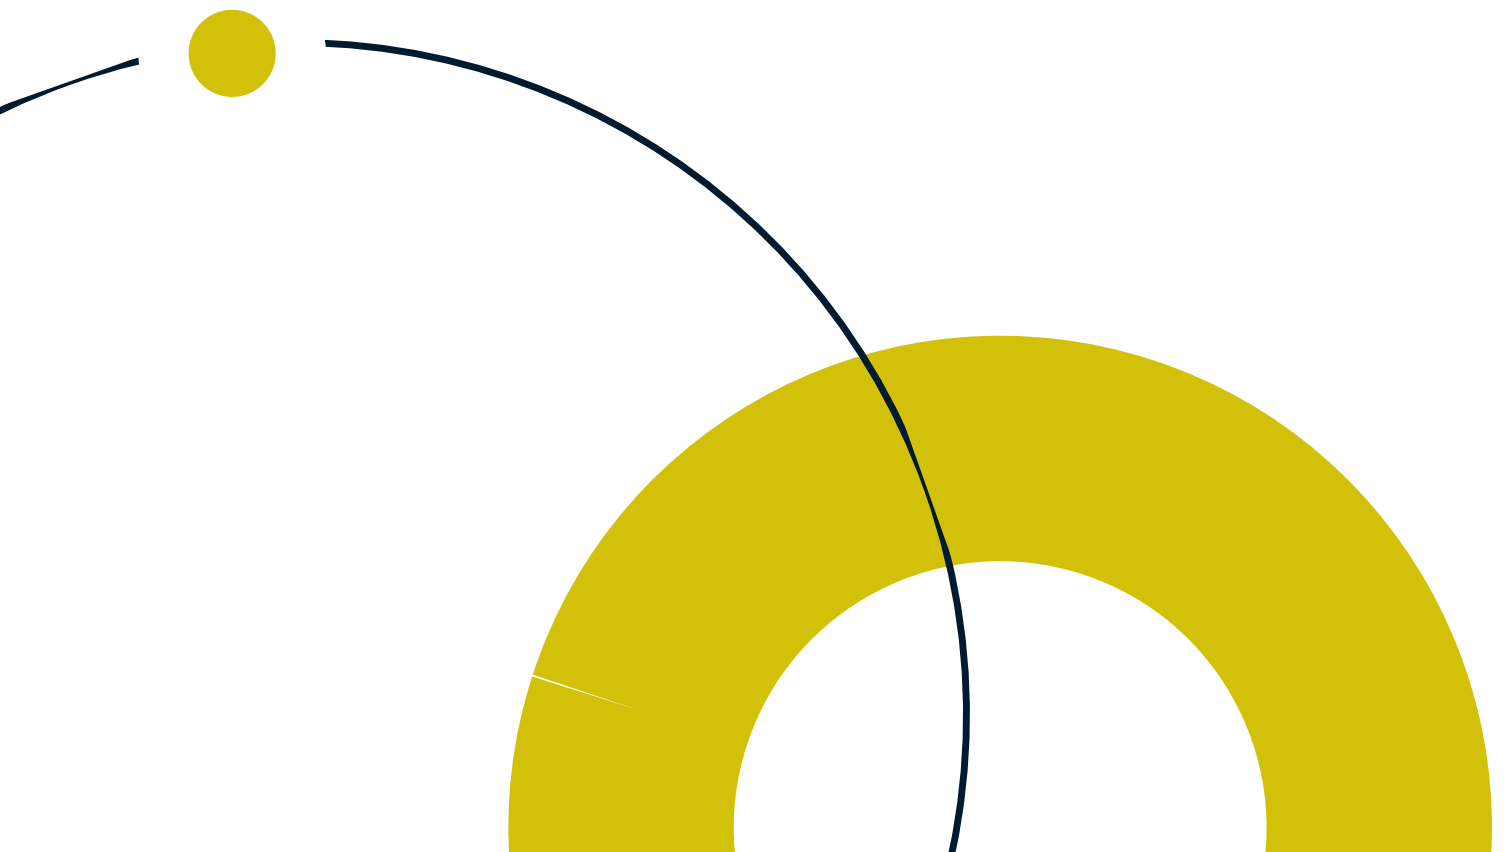

These pumps are ideal for construction, mining, industry and agricultural use.

6. WATER PUMPS

Pumps used in commercial, industrial and agricultural operations all work in the same way. They basically move water using a piston or a impellor, to create force, which makes the water flow.

You get many different types of pumps including an in line water pump, submersible pumps, a trash pump, transfer pumps and a utility pump.

If you're looking for a water pump solution that's reliable and convenient, Goscor Power Products offers a wide range of water pumps. We have pumps that work for clear water and dirty or trash water applications, high head pumps and specialised pumps that work in agriculture, to pump fertiliser to irrigation systems.

HOW DOES A HIGH PRESSURE PUMP WORK?

Pumps used in commercial, industrial and agricultural operations all work in the same way. They basically move water using a piston or a impellor, to create force, which makes the water flow. A centrifugal water pressure pump has two ends. All water pressure pumps need power to operate, and Goscor's range of pumps are available in diesel and petrol.

You get many different types of pumps including an in line water pump, submersible pumps, a trash pump, transfer pumps and a utility pump.

Clear Water Pumps:

Clear water pumps are perfect for draining water from swimming pools, sumps and reservoirs, and dewatering at construction sites or for pumping water from rivers to reservoirs. These pumps can also be used for other applications like removing floodwaters.

Goscor Power Products offers a petrol water pump and diesel water pump selection, ranging from 16m³/hr to 140³/hr. We offer Rato, Lutian and Weima branded pumps. Whether you've got a construction site that needs dewatering or are looking for a water pump for your farm, Goscor offers pumps for construction, mining, industrial and agricultural use.

If you're wondering about a water pump price, contact Goscor today for a quote on all our pumps. Our water pump price is very competitive, and we offer a range of the best water pumps on the market.

6.1 PETROL WATER PUMP

At Goscor Power Products, we offer a vast selection of petrol water pumps including brands like Rato and Lutian, to customers across the construction and engineering fields. Our range of petrol water pumps in South Africa are built strong and can be depended upon to handle any tough dewatering or floodwater removal job necessary.

6.2 HIGH HEAD PUMPS

High head water pumps are essential equipment for irrigation, agricultural and industrial sectors and Goscor Power Products is your one-stop shop when looking for high head pumps.

The high volume high head water pumps that we offer can handle more resistance than normal pumps and are designed to be able to efficiently pump water at high heads.

For more on our range of high head centrifugal pumps, call Goscor Power Products today on 087 542 0256 / 087 806 6872 or request a water pump quote now.

Rato High Head Pump -
RT80YB70

Lutian High Head Pump -
LT-178F20H

Water Pumps

WHAT IS A HIGH HEAD WATER PUMP?

A high head pump is designed with performance and efficiency in mind. Its main performance goal is to create high water pressure, which then enables water to be sucked out and pumped away over high heights and long distances. A high head or high-pressure pump has large impellers and a high rotational speed to enable it to pump water upwards, ensuring excellent performance. Goscor Power Products offers Rato petrol high head pumps.

No matter what your high water pumping needs are, a professional consultant at Goscor Power Products will be able to suggest a product in our range that will be able to tackle the job you need it for.

6.3 SEMI TRASH & TRASH PUMPS

If your work site requires a pump that can get rid of waste, slurry or dirty water efficiently and with ease, check out the Goscor Power Products range of trash and semi trash water pumps today. As the leaders in construction equipment for over 30 years, we are sure that we will have a trash pump or semi trash pump available to meet your needs today.

For more on our range of trash and semi trash water pumps, call Goscor Power Products today on 087 542 0256 / 087 806 6872 or request a water pump quote now.

Rato Petrol Trash Pump -
RT100NB26

Rato Petrol Semi Trash Pump -
RT80WB26-3.8Q

Water Pumps

WHAT'S THE DIFFERENCE BETWEEN A TRASH PUMP AND A SEMI TRASH PUMP?

A trash pump can remove water that's filled with a lot more waste, including solids up to 25mm in size. If the debris in the water is large, like sticks and stones, you will need a trash pump to pump the water. The vanes on a trash pump are thicker and open so that the pump can handle much sandier, dirtier, debris-filled water.

A semi trash pump is very similar to a trash pump with thick impeller vanes and a large opening to allow dirt and debris to travel through it, however a semi trash pump is generally used to pump water that is a little murky and dirty but does not contain large particles, but can handle soft solids.

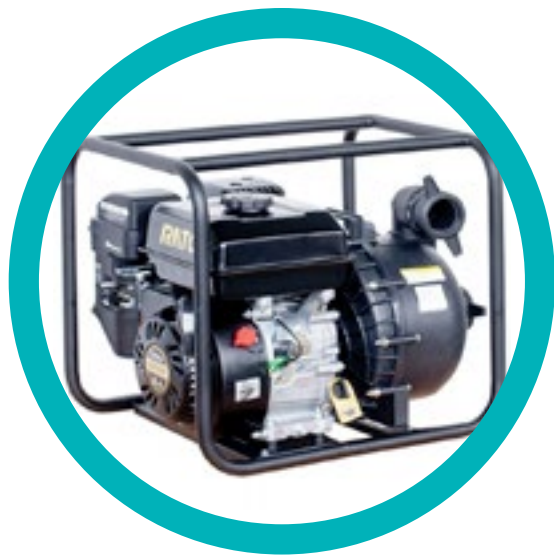

Chat to the Goscor Power Products team about your clean water needs and they can suggest a semi trash or trash pump that will fit your exact specification and requirements today.

6.4 FERTILIZER PUMPS

Fertilising your crops are an absolutely essential part of ensuring a bumper harvest. Using an efficient fertilizer pump with excellent features and capabilities, will make this process that much easier and will ensure a wider application and better outcome. At Goscor Power Products we understand the needs of our agricultural clients intimately and that's why we stock a range of fertilizer pumps for the agriculture sector in particular.

For more on our range of fertilizer pumps call Goscor Power Products today on 087 542 0256 / 087 806 6872 or request a water pump quote now.

Rato Petrol Fertilizer Pump

Weima Diesel Fertilizer Pump

Water Pumps

WHAT IS A FERTILIZER PUMP?

Fertilizer pumps transfer fertilizer to your supply and nurse tanks. Your fertilizer pump is the key piece of equipment in this setup. Studies have shown that by providing the right amount of fertilisation to your crops, you can triple the size of your harvest. The Goscor Power Products range of fertilizer pumps are durable and easy to use. Our range of both Rato and Weima fertilizer pumps for transfer of the fertilizer.

Our pumps are durable and easy to use. One of the reasons a fertiliser pump works so well is that it delivers many small applications of nutrients, which is the best way to get plants a consistent dose without overpowering them. Goscor Power Products stock both Rato and Weima fertiliser pumps.

ENGINES

Our Engines are affordable and reliable for most construction companies, bakkie builders and hire companies.

We offer petrol and diesel engines from 5HP up to 23HP. The brands on offer are Rato and Weima. Electric Start options available. Reduction Gearbox Engines available in Petrol & Diesel.

Our engines are most suitable for heavy duty applications such as Construction, Agricultural & Industrial uses.

7. ENGINES

Goscor's range of engines can be used for many different heavy-duty applications such as construction, agricultural and industrial uses.

The construction industry is relentless, requiring strong, reliable engines. We can help to keep power flowing at your construction site, supplying high performance engines for different types of machinery.

Engines used in agriculture can help farmers keep up with the constant mechanisation happening on our farms. Engines to suit all your needs.

Goscor Power Products offer an array of new engines for different applications. We have smaller engines as well as larger, more powerful ones. Our engines can deliver good fuel economy while still offering the performance required. Our petrol and diesel engines start from 5 Horse Power up to 23 Horse Power. The brands on offer are Rato and Weima.

Our engines are affordable and reliable for most construction companies, bakkie builders and hire companies.

We can offer electric start options and reduction gearbox engines in petrol and diesel.

Whether you need petrol or diesel engines, we can supply them all.

MAINTAIN YOUR ENGINE TO LENGTHEN ITS LIFE

Like any piece of equipment, engines need to be maintained to stay in top condition. Here are some tips for maintaining your engine:

- **Check your oil regularly. If you are running your engine non-stop, you may need to check oil as often as every 5 hours. (Rato Engines are fitted with a low-level oil sensor which will cut the engine off when the oil level drops too low)**
- **Change oil when the engine is still warm. Make sure you use good quality oil. (Multi-Grade Oil is recommended)**
- **Check the oil filter and air box and make sure they are clean. Clear any debris away from the carburetor intake.**
- **If you're not using the engine, drain the fuel and run the carburetor dry.**
- **When refueling the engine, make sure the engine is cool, and that your refueling area is well ventilated. Do not re-fuel the engine, when it is running as it can be a fire hazard.**

Whatever your needs, Goscor Power Products can offer a complete engine solution to get you powered up.

To find out more about our engines, or to get a quote on an engine, contact us today.

7.1 PETROL ENGINES

We offer stand-alone petrol engines as well as replacement engines for water pumps, generators, fire fighters, drive units, power trowels, concrete cutters, rammers, rollers, plate compactors, drive units, concrete mixers, brick saws and high pressure washers.

If you have a piece of equipment with an engine that has become unserviceable, Goscor Power Products can supply you with a new petrol engine for your machinery. OEM's (Original Equipment Manufacturers) purchase our engines to fit to their application.

GOSCOR STOCK POWER AND RATO PETROL ENGINES

Goscor Power Products stocks various types of petrol engine. The Rato range of petrol engines vary from 7 Horse Power to 23 Horse Power.

Rato are known for their high-quality petrol engines that offer a rugged, hardworking solution for your engine needs. Rato engines all have a cast iron cylinder liner which makes them more durable. They also feature a transition ignition system which improves the life of the ignition parts and improved performance.

Because Rato engines feature a standard mounting you can use them interchangeably with most other petrol engine brands. All engines are manufactured to high quality standards and carry an ISO9001 rating.

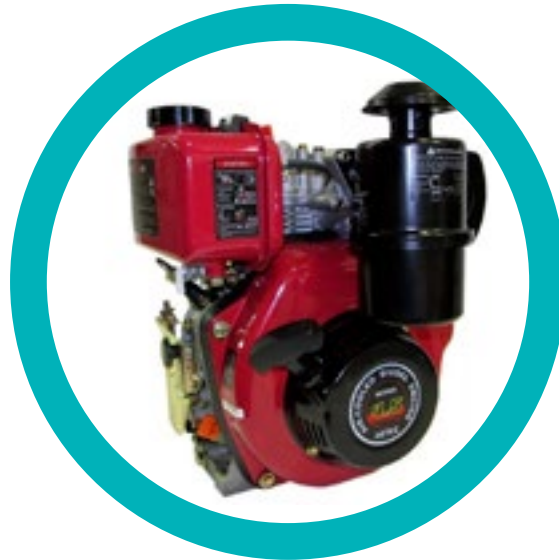

Goscor also stocks engines which are suitable replacement engines for Honda Rammers.

Goscor engines can be used with a variety of Goscor Power Products. We have specialised lawnmower petrol engines as well as engines for other products including cement mixers and rammers.

ENGINE MAINTENANCE TIPS

Oil is the life blood of your engine, so make sure you have enough oil at all times. Oil provides the lubrication needed to keep your engine going. Check the oil after every 5 hours of continuous running or once a day. Change the oil when the engine is still warm. Make sure you use a high-quality oil. The Rato Range of Engines feature a low oil level cut off switch which stops the engine when the oil level is too low.

Clean out the air filter regularly. Check it for dirt or debris and change it if necessary, and make sure the carburetor intake is clean. Rato Engines are available with Cyclone Air Filters or Snorkel Filters for very dusty operations. Drain the fuel out of the engine when not in use, also run the carb. Dry before storing the engine.

7.4 RAMMER REPLACEMENT ENGINES

FOR A VARIETY OF REPLACEMENT ENGINES, CALL GOSCOR TODAY.

Goscor stock Honda Rammer replacement engines. Our Power GX100 and GXR120 engines can be used as replacement engines in Honda Rammers.

Our Rato Petrol engines range from 7 to 23 Horse Power. These engines are known for their durability and consistent performance. Every Rato engine boasts a cast iron cylinder liner which helps to reduce oil consumption. We also stock Rato Petrol lawnmower engines. Our Engines used for compaction or Cutting applications come with either Cyclone Air Filters or Snorkel type air cleaners for dusty conditions, which ensures longer durability.

Finally, we also stock Weima Diesel Engines ranging from 5 Horse Power to 12 Horse Power.

FIRE FIGHTING EQUIPMENT

When it comes to the most affordable and reliable firefighting equipment on the market, Goscor Power Products are the firefighting equipment suppliers to beat.

For the construction, mining, industrial or agricultural sectors, our range of firefighting equipment is varied and able to take on the toughest safety jobs.

8. FIRE FIGHTING EQUIPMENT

We offer an array of options like high-pressure units suitable for grass fires to medium-pressure and semi options suitable for forestry applications. We also stock a variety of reload kits, pumps and other accessories too.

Our products have a 620l low profile water tank (step tank) with a low centre of gravity to ensure vehicle stability. The tank has two baffles inside to improve stability during transportation and is coated with a specialised coating to prevent algae growth.

For more on the firefighting units call Goscor Power Products on 087 542 0256 / 087 806 6872 or request a quote now.

For over 30 years, Goscor Power Products has been supplying high-quality power products to a host of industries across Southern Africa. When it comes to reliability, quality and ultimate affordability choose from our wide selection today. We guarantee that you won't be disappointed.

Chat to one of our friendly sales consultants to find out more about the cost of firefighting equipment that we offer today. Choose a company that understands your needs and has the product range to prove it.

Choose the leaders in construction equipment, a company you can trust.

For more information on our firefighting tools range or to request a quote, contact us now.

TOUGH, RELIABLE UNITS

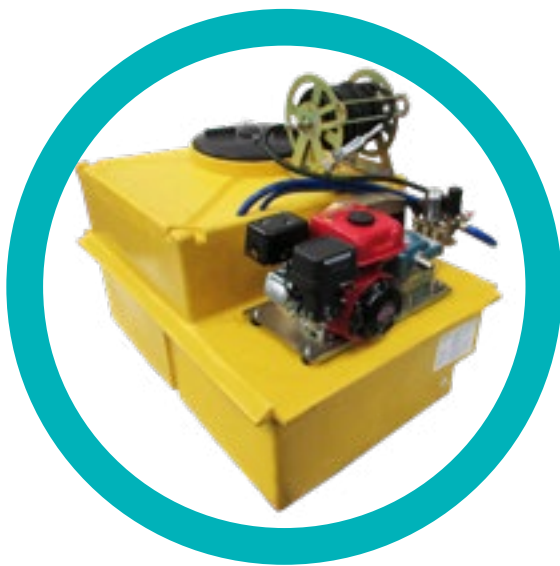

Whether you are looking for gear to deal with grass fires or options for other applications, at Goscor Power Products we have a large collection of different firefighting equipment to choose from.

Our high-pressure pumps utilise the Ruby TR22 & TR60 pumps and are powered by petrol or Diesel engines. We pride ourselves in offering:

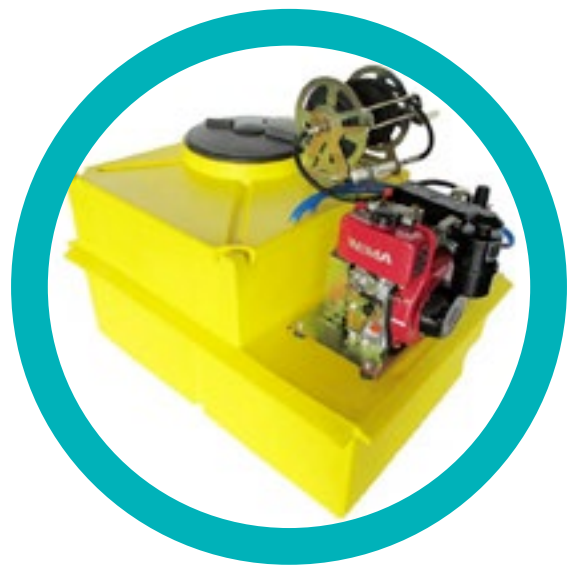

- **Tank options – we offer 620Lt Polyethylene Tanks which are UV stabilized with specialised coating and lining to restrict algae growth.**
- **Pumps – the Ruby TR22 Piston pump delivers 22L/min and has a max pressure of 40BAR. The Ruby TR60 Piston pump delivers 60L/min and has a max pressure of 40BAR. Both include an automatic unloader valve which regulates pressure and has stainless steel pistons and acid resistant seals.**
- **Adjustable nozzle types include a 1 x 20m high-pressure hose which is provided on a hose reel. Our pistol type variable spray gun can be adjusted from fog spray to solid stream.**

All our units are mounted on anti-vibration rubbers. We also offer a 12-month warranty on all manufactured parts (Ts and Cs apply).
